In all other cycles, the first byte represents the cycle, the 2nd byte represents the institution and the fourth byte represents the program. Therefore, beginning with cycle 2, the cycle 1 identifiers (i.e., 11, 12, 13, 21, 22, 23, 31, 32, 41) will become four digits long (i.e., 1101, 1102, 1103, 1201, 1202, 1203, 1301, 1302, 1401) respectively.

Variable Name: **ELJBVD3** *Position:* 468 *Length:* 2

Note: This variable was derived from the variables: JENDATX3_7, FSTJOB3 and JOBCNTA.

The verification of the job eligibility is not performed on all jobs, but on a maximum of 6 jobs (first 6 jobs reported by the respondent) worked at during this cycle. However, this maximum can be increased by one eligible job in the case where a seventh job (first job after leaving full-time schooling) is reported and that this job ends in 2002 or 2003 and is different from the jobs (1 to 6) reported earlier. In this case, this seventh job is automatically considered as eligible. For this reason, two variables are created in order to calculate the number of jobs in 2002-2003. The variable ELJBVD3 indicates the number of eligible jobs up to a maximum of 7 jobs (based on first 6 jobs + first job after leaving full-time schooling), while the second variable ELJBNVD3 contains the remaining number of jobs for which no verification was possible.

A code of 95 indicates that the respondent has not yet begun a job after leaving full-time schooling. First job after leaving full-time schooling identifies the job a respondent held at the time of leaving full-time schooling or the job she/he first started after leaving full-time schooling. During survey collection, respondents who were no longer full-time students in December 2003 were asked to report the first job they worked at after leaving full-time schooling. A procedure was then created to validate the job reported by respondents as their first job after leaving full-time schooling and/or when not reported, to identify one of the other jobs reported as being "first job".
