Please correct any mistakes in name or address

While your participation in this survey is voluntary, your cooperation is important to ensure that the information collected in this survey is as accurate and as comprehensive as possible.

The purpose of this survey is to provide information on seed corn sales and to aid in the determination of corn acreage in the different areas of Canada. Individual returns are kept confidential but the completed summary of the results will be use by the companies participating, their regional committees, agricultural departments, farm organizations and the general public.

1. Report only sales for planting during 2009.
2. Include imported seed corn in sales figures.
3. Report only seed corn used for grain and fodder (do not include sweet corn).
4. Do not include seed corn shipped as replacement seed at no charge.
5. Report measure in units (eg. sacks, bags).
6. Do not include sales to the other wholesalers, seed cleaning plants and processors. These are already being surveyed. This precaution is to avoid double-counting.

If complete data is not available, please give us your best estimate.
