Help text:

Purpose:

To identify the person who is providing, or who provided, the data for the survey component.

Appropriate question wording is generated using proxy status and the sex of the individual for whom the component is being completed.
The quality of the collected data is evaluated using proxy status.

Definition:

Non-proxy: the respondent is providing information about him or herself.

Proxy: the respondent is providing information about someone else.

CCHS-Nutrition proxy interview types:

Selected respondent ages 1 to 5: Proxy only

* The parent or guardian is asked to provide the child's information.

(but children aged 2 and older have to be present for the measurement of height and weight)

Selected respondent ages 6 to 11: Parent-assisted

* The child is asked to provide his/her information with the help of his/her parent or guardian.

(at least for Dietary Recall, the measurement of height and weight, and the Physical Activity of Children and Youth module)

Selected respondent ages 12 and up: Non-proxy only

* The respondent is asked to provide his/her own information.

(except for reasons of physical or mental health)

Functionality:

<F5> "Refusal" and <F6> "Don't Know" are disabled for this question.

Training:

*** For respondents aged 2 to 5, the interview is proxy with a parent or guardian but it is critical that the child is present for height and weight measurements.

Canadian Community Health Survey (CCHS) – Nutrition, 2015
Second interview

Automated Multiple Pass Method (AMPM)

AMPM_BEG

AMPM_R1

The 24-Hour Dietary Recall interview is composed of 5 Steps:

1. Quick List: The Quick List step is designed to get a quick collection of easily remembered foods, including snacks and water. In this step, respondent reports a listing of all foods and beverages consumed in a 24-hour period during the day before the interview in any order he/she wishes (without being interrupted by the interviewer). That is, the respondent is free of the burden of reporting the foods in a chronological order, so his/her mind can be free to reflect on the foods actually eaten.

INTERVIEWER: Press <1> to continue.

AMPM_R2

2. Forgotten Foods: This step is designed to collect foods that may have been forgotten during the "Quick List" step. The respondent answers a series of questions probing for forgotten foods from various categories: non-alcoholic beverage, alcoholic beverages, sweets, savoury snacks, fruits, vegetables, cheese, breads and rolls, and any other types of foods.

INTERVIEWER: Press <1> to continue.

AMPM_R3

3. Time and Occasion: The respondent reports the time he/she began eating or drinking each of the reported foods and what he/she would call the eating occasion (e.g. breakfast, lunch) - as defined by the respondent for this food. These questions are designed to help the respondent remember and report his/her eating patterns over the 24-hour period of the previous day, as well as to group together the foods eaten at the same time.

INTERVIEWER: Press <1> to continue.

**INFORMATION COPY
DO NOT USE TO REPORT**

Canadian Community Health Survey (CCHS) – Nutrition, 2015
Second interview

AMPM_R4

4. Detail Cycle: This step is reserved for more detail oriented questions, executed by the interviewer after having developed a rapport. Respondent answers standardized questions to probe for detailed information about each food and beverage reported in the Quick List step. The questions include probes for: food descriptions, food amounts, additions to the foods, and preparation methods.

A "Food Model Booklet" is used as the main measuring guide to help the respondent describe the size or amount of the food consumed. The booklet contains pictures of various sizes of glasses, mugs, bowls, mounds/pats/spreads, and circles. In addition, it includes a grid, two wedges, and a page of shapes and chicken pieces.

Reviews of eating occasions and times between occasions are also included in this step to elicit forgotten foods. Once information about the eating occasion is complete, then the respondent is asked where the meal was eaten. The application flows in a chronological order.

INTERVIEWER: Press <1> to continue.

AMPM_R5

5. Final Probe: A final probe is asked to collect additional foods that may have been consumed, but not remembered or mentioned earlier during the interview.

INTERVIEWER: Press <1> to continue.

Health Number Validation (HN)

HN_BEG

External variables required:

DV_HNPROV: Province of respondent's health card
DV_HNSEX: Sex of respondent (needs to be derived before the HN block is called)
SEX_Q01: sex of respondent (1= male, 2 = female) from Sex Block
PROXY: proxy interview status from the GR block (1= proxy; 2 = non-proxy)
PROXYSEX: (1= male non-proxy; 2 = female non-proxy; 3 = male proxy; 4 = female proxy)
ASKTWICE : flag to indicate use of double-capture option (from sample)
HN_Good: Yes/no flag created by HN validation algorithm.

HN_Q01

What is your health number?

INTERVIEWER: Enter a health number for [Newfoundland and Labrador/Prince Edward Island/Nova Scotia/New Brunswick/Quebec/Ontario/Manitoba/Saskatchewan/Alberta/British Columbia/Yukon/the Northwest Territories/Nunavut]. In [Newfoundland and Labrador/Prince Edward Island/Nova Scotia/New Brunswick/Quebec/Ontario/Manitoba/Saskatchewan/Alberta/British Columbia/Yukon/the Northwest Territories/Nunavut], the health number is made up of [twelve numbers/eight numbers/ten numbers/nine numbers/four letters followed by eight numbers/ten numbers]. Do not include the two letters at the end for green health cards/nine numbers beginning with 002/one letter followed by seven numbers]. Do not insert blanks, hyphens or commas between the numbers.

[Note: In Manitoba, health numbers of families can be listed on the same card. Be sure to capture the intended respondent's health number if there is more than one on the card./Note: In British Columbia, residents may have a combined driver's license and health card. If the respondent has a combined card, the health number is on the back above the barcode./""]

(12 spaces)

DK, RF

Processing:

This is the variable associated with LNK_HN on release.
