

QUALITY ASSURANCE SURVEY ON NAICS – BUSINESS REGISTER

Question 1:

- Confirm legal name and operating name

Question 2:

- Confirm operating address

Question 3:

- Ask for the main business activity taking place at the operating address
 - For Simple units, the interviewer does not check the NAICS on the base beforehand
 - For the Complex units, the interviewer checks the base in order to get familiar with the business structure before calling the respondent
- Classify the unit based on the description provided by the respondent (once the interviewer has classified the unit, the QAS - *Quality Assurance Survey* system will reveal the current NAICS in the BRS – *Business Register System*)
 - If the new NAICS is the same as what currently appears on the BRS, the interview is finished
 - If the new NAICS is different, inform the respondent that the activity they have provided is different from the one currently on our base and ask him/her to choose the description which better describes the current business activity
 - If the respondent chooses the BRS description (current), the interview is finished
 - If the respondent chooses the new description, ask him/her if the business has ever performed the BRS (current) activity
 - If the answer is yes, ask the respondent when the activity change occurred and update the code and description at this date on BRS
 - If the answer is no, update the code and description on BRS
