

Occupation Concordance Table for the National Construction Industry Wage Rate Survey

Introduction

This table gives the master list of occupations used in the series of National Construction Industry Wage Rate surveys and their relationship to the standard National Occupation Classification (NOC) categories. This custom classification of occupations (called "sub groups") was developed at the survey sponsor's request both to collect data on sub-NOC groupings and to tailor the survey to occupation concepts most familiar to respondents in each region. The master list was initially established based on consultation with union and employer representatives from the construction industry across Canada. As well, the sub groups used in each regional survey are selected from the master list in consultation with union and employer representatives from the region. Since the intention is that different sub groups can be chosen in different regions for the same type of occupation, there is some overlapping of sub groups on the master list.

For the most part the sub groups are sub-NOC groupings, but in some cases there is a one-to-one correspondence between the sub group and the NOC category. In a few cases the sub group includes all or parts of different NOC categories.

The Statistics Canada NOC definitions can be found on our website at <http://www.statcan.ca/english/Subjects/Standard/soc/2001/nocs01-index.htm>. The Human Resources and Social Development Canada (HRSDC) definitions provide additional detail. They can be found on the HRSDC website at <http://www23.hrdc-drhc.gc.ca/2001/e/generic/welcome.shtml>.
