## LIMITED USE DATA PRODUCT LICENCE AGREEMENT

The Government of Canada (Statistics Canada) is the owner or a licensee of all intellectual property rights (including copyright) in this data product. In consideration of your payment of the requisite fee, you or your organization, as the case may be, (hereinafter referred to as the Licensee®) are granted a non-exclusive, non-assignable and non-transferable licence to use this data product subject to the terms below.

This licence is not a sale of any or all of the rights of the owner(s). This data product may be used only by you or your organization, as the case may be. No part of the data product nor any right granted under this agreement shall be sold, rented, leased, lent, sub-licensed or transferred to any other person or organization. The licensee shall not use any part of the data product to develop or derive any other data product or data service for distribution or commercial sale, without a licence to do so. The licensee may not disassemble, decompile or in any way attempt to reverse engineer any software provided as part of the data product.

The licensee may not transfer this data product to or store the data product in any electronic network for use by more than one user unless it obtains prior written permission from Statistics Canada and pays any additional fees.

This data product is provided As-is,® and Statistics Canada makes no warranty, either express or implied, including but not limited to, warranties of merchantability and fitness for a particular purpose. In no event will Statistics Canada be liable for any indirect, special, consequential or other damages however caused.

This agreement will terminate automatically without notice if the licensee fails to comply with any term of this agreement. In the event of termination, the licensee must immediately return the data product to Statistics Canada or destroy it and certify this destruction in writing to Statistics Canada.

It is YOUR RESPONSIBILITY to ensure that your use of this data product complies with these terms and to seek prior written permission from Statistics Canada for any uses not permitted or not specified in this agreement.

**ANY USE WHATSOEVER OF THIS DATA PRODUCT SHALL CONSTITUTE YOUR ACCEPTANCE OF THE TERMS OF THIS AGREEMENT. For further information please contact:**

## INTRODUCTION

Neighbourhood Income and Demographics contains *counts* and *income* data for all taxfilers and dependents reporting income. Also included are demographic data on the Canadian population, such as marital status, gender, age groups and single years of age.

The information is accurate and current. It is obtained from income tax records and is updated annually.

These data will be a valuable aid to anyone assessing the sociological and financial status of residents in the geographic area of interest to them.

## SECTION I -- THE DATA

### **Data Source**

The data are derived from income tax returns. For the most part, tax returns were filed in the Spring of the year following the reference year. The mailing address at the time of filing is the basis for the geographic information in the tables.

New to the product beginning with 1992 data are demographic statistics for the both taxfilers and dependents. These statistics are derived from the Small Area and Administrative Data Division family databank built from the income tax records and other sources. For data of previous years (up to and including 1991), demographic statistics were provided for taxfilers only.

### **Data Currency**

Since the data are taken from tax records, they are current data from tax returns filed for the year noted on the tables. For example, 1998 income records are taken from 1998 tax returns filed in Spring of 1999, with data released in July 2000. Data are always current, since they are updated on an annual basis.

### **Data Quality**

The data appearing in the tables are taken directly from the Small Area and Administrative Data Division family databank, built from the income tax and the Canada Child Tax Benefit records. Information on income is obtained from the taxfilers, for both themselves and their non-filing spouses. Demographic information is derived from taxfilers and non-filing dependent spouses and/or children, such as the estimates of "total taxfilers and dependents".

In 1998, about 70.5% of Canadians (of all ages) filed tax returns (see figure 1).

Most children do not file because they have low or no income.

Similarly, some elderly Canadians receiving only Old Age Security (OAS) and Guaranteed Income Supplement (GIS) do not file because they have low or no taxable income. However, with the introduction of the Federal Sales Tax Credit in 1986 and the Goods and Services Tax Credit in 1989, the percentage of the elderly population filing tax returns has increased. In 1998, 93.9% filed tax returns, up from 75% in 1989.

**FIGURE 1 – COVERAGE**

<b>Tax year</b>	<b>Number of Taxfilers ('000)</b>	<b>Date of Population Estimate</b>	<b>Population ('000)</b>	<b>Coverage (%)</b>
1990	18,450	April 1, 1991	27,578	66.9
1991	18,786	April 1, 1992	27,938	67.2
1992	19,267	April 1, 1993	28,273	68.1
1993	19,882	April 1, 1994	28,618	69.5
1994	20,184	April 1, 1995	28,939	69.8
1995	20,536	April 1, 1996	29,261	70.2
1996	20,772	April 1, 1997	29,577	70.2
1997	21,113	April 1, 1998	29,893	70.6
1998	21,431	April 1, 1999	30,168	71.0

Percent coverage is based on a comparison of the number of taxfilers in the Small Area and Administrative Data Division's taxfiler databank and the latest population estimates from the Statistics Canada publication *Quarterly Demographic Statistics* (catalogue no. 91-002), now available on the Statistics Canada web site [www.stscan.ca](http://www.stscan.ca).

The initial population used to develop the estimated population counts comprise all taxfilers for the reference year and represents over two-thirds of the Canadian population. Taxfilers from the same family including children are matched using common links (e.g., same name, same address).

When there are indications that one or several members of a family are missing (for instance children), those members are imputed. The remaining taxfilers who have not been matched in the family formation process become non-family persons. The resulting population counts approximate the total Canadian population.

The Small Area and Administrative Data family databank population estimates compare well with estimates obtained through other sources. For example, coverage rates by age from the databank, compared to the official population estimates, are:

**FIGURE 2 – COVERAGE BY AGE AND BY PROVINCE**

<b>1998 Rates of Coverage by Age</b>		<b>1998 Rates of Coverage by Province</b>	
under 20	101.0%	Newfoundland	99.2%
20-24	88.1%	Prince Edward Island	97.8%
25-29	90.2%	Nova Scotia	96.4%
30-34	94.4%	New Brunswick	97.9%
35-39	95.2%	Quebec	97.6%
40-44	95.5%	Ontario	95.0%
45-49	94.9%	Manitoba	97.8%
50-54	93.4%	Saskatchewan	97.5%
55-59	93.3%	Alberta	96.1%
60-64	95.6%	British Columbia	93.1%
65-74	98.5%	Yukon Territory	94.8%
75+	94.8%	Northwest Territories	92.4%
Total	95.9%	Nunavut	93.2%
		Canada	95.9%

% coverage by age is based on a comparison with the estimated population counts to July 1, 1999 from Statistics Canada catalogue number 91-213-XPB, *Annual Demographic Statistics*. Coverage by province is based on a comparison with the estimated population counts to April 1, 1999 produced by the Demography Division of Statistics Canada.

### Individuals

Beginning in 1992, Total Income was changed to include income of non-filing spouses reported on the taxfiler's income tax return. This increased the population of lower income individuals, subsequently lowering the median total income of the population. See the following table (figure 3).

**FIGURE 3 – MEDIAN INCOME, INDIVIDUALS**

<b>Year</b>	<b>Median Income, Individuals</b>		<b>% ratio</b>
	<b>T1FF</b>	<b>SCF/SLID</b>	
1990	19,100	18,737	101.9
1991	19,300	19,040	101.4
1992	18,600	19,667	94.6
1993	18,000	19,400	92.8
1994	18,500	19,587	94.5
1995	18,900	20,134	93.9
1996	19,000	20,202	94.1
1997	19,400	20,581	94.3
1998	20,100	20,643	97.4

Note: SCF (Survey of Consumer Finances) was replaced by the SLID (Survey of Labour and Income Dynamics); medians for 1990-1997 are from Statistics Canada's annual publication 13-207, *Income distributions by size in Canada*. The 1998 median is from Statistics Canada catalogue 75-202-XIE, *Income in Canada, 1998*. T1FF medians are from the family databank of the Small Area and Administrative Data Division.

In comparing transfer payment totals to 1998 figures from other data sources, it is evident that our coverage is high.

**FIGURE 4 – TRANSFER PAYMENT COVERAGE**

<b>Transfer Payment</b>	<b>Coverage</b>	<b>Source of Comparison</b>
Employment Insurance Benefits	87%	CANSIM matrix 5702 <sup>1</sup>
Canada Child Tax Benefits	97%	National Accounts <sup>2</sup>
Old Age Security Benefits	94%	Human Resources Development Canada <sup>3</sup>
CPP/QPP Benefits	91%	HRDC and RRQ <sup>3,4</sup>
Social Assistance	68%	National Accounts <sup>2</sup>
Workers= Compensation	86%	National Accounts <sup>2</sup>

Sources: 1) *Employment Insurance Statistics* from the Labour Statistics Division, Statistics Canada; 2) unpublished data from the System of National Accounts, Statistics Canada; 3) *Statistics Related to Income Security Programs, June 1999*, Human Resources Development Canada; 4) *Statistiques 1998*, Régie des rentes du Québec.

## Confidentiality and Rounding

All data are subject to the confidentiality procedures of rounding and suppression.

To protect the confidentiality of Canadians, counts are rounded. Rounding may increase, decrease, or cause no change to counts. Rounding can affect the results obtained from calculations. For example, when calculating percentages from rounded data, results may be distorted as both the numerator and denominator have been rounded. The distortion can be greatest with small numbers.

All reported amounts are rounded to the nearest thousand dollars.

Since 1990, data cells represent counts of 15 or greater, and are rounded to a base of 10. For example, a cell count of 15 would be rounded to 20 and a cell count of 24 would be rounded to 20.

For 1988 and 1989 data, all counts are 25 or greater and are rounded to the nearest 25. Reported amounts are rounded to the nearest thousand dollars.

For data up to and including 1987, all counts are randomly rounded to a base of 5, and reported amounts are unrounded, but are adjusted according to the rounding of the counts.

Note: *Counts* represent the number of persons.  
*Reported amounts* are aggregate dollar amounts reported.

## Suppressed Data

To maintain confidentiality, data cells have been suppressed whenever:

- areas comprise less than 100 taxfilers;
- cells represent less than 15 taxfilers<sup>1</sup>;
- cells were dominated by a single filer.

Suppressed data may occur:

**i) within one area:**

Ä when one of the *income* categories is suppressed, a second category must also be suppressed to avoid disclosure of confidential data by subtraction (called residual disclosure) (see figure 3);

---

<sup>1</sup> Likewise, the median income is omitted when the rounded count of a category is less than 30 (15 on either side of the median).

Ä when one of the *gender* categories is suppressed, the other *gender* category must also be suppressed to avoid residual disclosure (see figure 3);  
 Ä when one age group category is suppressed, another age group must also be suppressed to avoid residual disclosure.

**ii) between areas:**

Ä when a variable amount in one area is suppressed, that variable amount is also suppressed in another area to prevent disclosure by subtraction.

**FIGURE 5 - SUPPRESSION OF INCOME DATA,  
 AN ILLUSTRATION**

<b>Amount (Millions of Dollars)</b>			
	<b>Males</b>	<b>Females</b>	<b>Total</b>
Wages/Salaries/Commissions	6.7	3.4	10.2
Self-Employment	0.3	0.2	0.5
Dividends and Interest	1.2	1.1	2.3
Employment Insurance	0.7	0.3	1.0
Old Age Security/Net Federal Supplements	0.7	0.5	1.1
Canada/Quebec Pension Plan	1.1	0.5	1.6
Other Pensions	1.9	0.4	2.3
Canada Child Tax Benefits	x	x*	0.1
Goods and Services Tax Credit/Harmonized Sales Tax Credit	x**	x**	0.2
Workers' Compensation	0.1	0.1	0.2
Social Assistance	0.2	0.2	0.5
Provincial Refundable Tax Credits	0.1	0.1	0.2
RRSP Income	0.1	0.1	0.2
Other Income	0.6	0.6	1.2
<b>Total Income</b>	<b>14.5</b>	<b>7.8</b>	<b>22.3</b>

x Ä Confidential when reported by fewer than 15 taxfilers. (In the data supplied to clients, the suppressed cell will contain a "0".)

x\* For the same income variable, the value for the opposite gender was suppressed in the table to avoid disclosure by subtraction.

x\*\* The value for a second income variable was suppressed elsewhere in the table to avoid disclosure by subtraction.

## SECTION II -- THE DATA TABLES

### A – Number of Tables

Beginning with the 1994 data, the maximum number of tables for each area is reduced from nine to five. It is important to note that this reduction in tables has not resulted in any loss of information from previous years. A reformatting of existing tables was the primary reason for the change.

The table topics are the following:

1. Summary table, including data for five categories of the population:
  - a) taxfilers and dependents
  - b) taxfilers
  - c) persons with total income
  - d) persons reporting employment income and/or Employment Insurance benefits
  - e) persons reporting Canada Child Tax Benefits
2. Taxfilers and dependents by marital status and by age group
3. Taxfilers and dependents by single year of age
4. Taxfilers and dependents with income by source of income
5. Taxfilers and dependents with income by total income, sex and age group

Demographic characteristics are given for the total population in tables 1a, 2 and 3. Income distributions and sources of income are given for those taxfilers reporting some income and for non-filing spouses of taxfilers of those who's income is reported on the taxfiler record (tables 1c, 4 and 5).

For persons with employment income, medians by gender are given (table 1c).

See also the section AStatistical Tables - Footnotes and Historical Availability@.

## **B – Data Table Contents**

### **Population – Demographic Characteristics**

Demographic characteristics are given for the total population. The data are from the Small Area and Administrative Data Division family databank, built from the income tax records and other sources. Taxfiler counts are still provided in the summary table (table 1).

For data prior to 1992, demographic characteristics are provided for taxfilers only.

The marital status "Common Law" is reported in table 2. This is as a result of Canada Customs and Revenue Agency (formerly Revenue Canada) providing taxfilers with a separate box permitting common law couples to indicate their marital status. For data prior to 1992, it is undetermined where common law couples would have reported their marital status on the individual income tax return.

Characteristics such as age and marital status are as of December 31 of the reference year. The mailing address at the time of filing is the basis for the geographic information in the tables.

See also the following section on [AStatistical Tables - Footnotes and Historical Availability@](#).

## Statistical Tables - Footnotes and Historical Availability

### All tables:

- available for all postal areas starting with the 1986 data.
- available for Census Divisions starting with 1990 data.
- available for Census Metropolitan Areas starting with 1991 data.
- income ranges are cumulative and not discrete. This means that a person with an income of \$100,000 will be included in the \$10,000+ category, in the \$15,000+ category, in the \$20,000+ category, in the \$25,000+ category, etc.

### Table 1:

- available in the current format since 1994.
- previously (1986-1993) table 9 in a series of 9 tables.
- percent in apartments: it should be noted that this type of mail delivery service is identified by Canada Post, and applies to apartments with 50 or more units in urban areas.
- the counts of persons with total income may, in some cases, be higher than the count of taxfilers because the income of some non-filers is identified through the tax return of the filing spouse.
- demographic characteristics are available for the entire population since 1992; from 1986 to 1991 these characteristics related to taxfilers only.

### Table 2:

- available in the current format since 1994.
- previously (1986-1993) table 1 (marital status) and table 2 (age groups) in a series of 9 tables.
- marital status "single": the information by gender usually does not add to the total shown because the gender of the non-filing younger population is, in many cases, not known.
- demographic characteristics are available for the entire population since 1992; from 1986 to 1991 these characteristics related to taxfilers only.

### Table 3:

- available in the current format since 1994.
- information for the children between 0 and 18 years of age are derived from a variety of sources, including the taxfile, the Canada Child Tax Benefit file and provincial birth files. Not all these sources provide gender information, hence the gender data are not available. Because we use several sources of information for this population, the counts remain unrounded for these ages, while still respecting confidentiality rules.

Table 4:

- available in the current format since 1994. Previously (1986-1993) table 3 (counts of taxfilers), table 4 (amounts) and table 5 (median employment income) in a series of 9 tables.
- the sources of income have changed over the years, depending on the information available from the T1.
- for 1990-1995, transfer payments included government transfers and other (private) pensions; starting with 1996, private pensions are shown separately from government transfers.
- since 1994, OAS payments also include guaranteed income supplements and spousal allowances.
- information on Workers= Compensation and social assistance available as separate income sources only since 1994. Previously included in Anon-taxable income@.
- only persons with any income, whether filing or non-filing, are included here.

Table 5:

- available in the current format since 1994. Previously (1986-1993) table 6 (totals by gender), table 7 (males by age group) and table 8 (females by age group) in a series of 9 tables.
- only persons with any income, whether filing or non-filing, are included here.
- income groupings were changed from discrete to cumulative groups starting with 1993.
- some of the groupings were changed slightly over the years.

## SECTION III -- GLOSSARY OF TERMS

### **Age**

is calculated as of December 31 of the reference year (i.e., tax year minus year of birth). In the "Single Years of Age" table (table 3), counts of children aged 0 to 18 are not rounded, and the other ages of the population are rounded to the nearest 5.

### **Alberta family employment tax credit**

Beginning in 1997, this refundable tax credit essentially replicates the federal child tax benefit working income supplement. The maximum annual credit is \$500 per qualified dependent child. Included in *Provincial refundable tax credits/Family benefits* in the statistical tables.

### **Alimony**

payments from one former spouse to the other, for couples that are separated or divorced. Child support is also included in this variable, as reported on line 128 of the T1 tax form, where both alimony and child support are reported together, without distinction. Starting with 1998, this information is taken from line 156 of the T1 (support payments received). Included in *Other income* in the statistical tables.

### **British Columbia family bonus**

is a refundable tax credit commencing in July 1996 that essentially extends the federal child tax benefit working income supplement; it is administered by Canada Customs and Revenue Agency (formerly Revenue Canada) through the Canada Child Tax Benefit program. This tax credit applies to residents of British Columbia, and is calculated according to the earned income of the parents and the number of qualified dependents. Included in *Provincial refundable tax credits/Family benefits* in the statistical tables.

### **Canada Child Tax Benefit (CCTB)**

is a system that replaces (beginning with the 1993 data year) the previous federal Family Allowance program, the non-refundable child deduction and the refundable Child Tax Credit. It is an income supplement for individuals who have at least one qualified dependent child. The Canada Child Tax Benefit is also based on the individual's family income and the number of dependent children.

### **Canada/Quebec Pension Plan (CPP/QPP)**

are compulsory contributory social insurance plans that protect workers and their families against loss of income due to retirement, disability or death. Canada Pension Plan and Quebec Pension Plan benefits include all benefits reported for the reference year.

### **Census Division (CD)**

*See* section on Geography.

**Census Metropolitan Areas (CMAs)**

*See* section on Geography.

**CityID**

Since names can be, in some cases, quite long and cumbersome for handling in electronic files, municipalities are given a Acity identification number@.

**Counts**

indicate the number of persons or items represented in a variable (e.g., the number of taxfilers reporting income in the year in question).

**Dependents**

For the purpose of these databanks, dependents are the non-filing members of a family. We do not attempt to measure dependency in any way, but are able to identify certain non-filing family members, and include these in the total counts of people in a given area.

**Dividend income**

includes dividend income from taxable Canadian corporations (such as stocks or mutual funds) as reported on line 120 of the personal income tax return, and then grossed down to the actual amounts received; dividend income does not include dividends received from foreign investments (which are included in interest income and reported on line 121).

**Employment income**

includes wages and salaries, commissions from employment, training allowances, tips and gratuities, and self-employment income (net income from business, profession, farming, fishing and commissions).

**Employment Insurance (EI) *Previously Unemployment Insurance (UI)***

comprises all types of benefits paid to individuals under this program, regardless of reason, including regular benefits for unemployment, fishing, job creation, maternity, parental/adoption, retirement, self-employment, sickness, training and work sharing.

**Family benefits**

*See* Alberta family employment tax credit; British Columbia family bonus; New Brunswick child tax benefit supplement; Northwest Territories child benefit; Nova Scotia child tax benefit; Nunavut child benefit; Ontario child care supplement for working families; Quebec family allowance; Saskatchewan child benefit; Canada Child Tax Benefit.

**Forward Sortation Area (FSA)**

*See* section on Geography.

**Goods and Services Tax (GST) credit**

includes all amounts received through this program. In 1990, the Goods and Services Tax

Credit began replacing the Federal Sales Tax (FST) Credit. By 1991, the FST Credit no longer existed. Beginning in 1997, the GST was harmonized with the provincial sales taxes in Newfoundland, Nova Scotia and New Brunswick and became the Goods and Services Tax/Harmonized Sales Tax (GST/HST) credit.

### **Government transfer payments**

For the purpose of these data, transfer payments denote the following payments made to individuals by the federal or provincial governments: Employment Insurance, Family Allowance (to 1992), FST credit (in 1989 and 1990), GST credit (which began replacing the FST credit in 1990 and completely replaced it by 1991, and became the GST/HST credit starting in 1997), Child Tax Credit (to 1992), Canada Child Tax Benefit (starting with 1993), Old Age Security pension/net federal supplements, Canada and Quebec Pension plans, non-taxable income and provincial refundable tax credits (both beginning in 1990), Quebec family allowance (beginning in 1994), British Columbia family bonus (beginning in 1996), New Brunswick child tax benefit (beginning in 1997), Alberta family employment tax credit (beginning in 1997), Northwest Territories child benefit (beginning in 1998), Nova Scotia child tax benefit (beginning in 1998), Nunavut child benefit (beginning in 1998), Ontario child care supplement for working families (beginning in 1998) and the Saskatchewan child benefit (beginning in 1998). The individuals in this case receive these payments without providing goods or services in return. Previous to the 1996 data, <sup>a</sup>Transfer payments<sup>a</sup> also included superannuation and other (private) pensions.

### **Harmonized Sales Tax (HST)**

In Newfoundland, Nova Scotia and New Brunswick, the provincial sales tax has been harmonized with the Goods and Services Tax (GST) since 1997, to become the harmonized sales tax. For this reason, the federal GST credit is now known as the GST/HST credit.

### **Income aggregates**

are rounded to the nearest thousand dollars. *See also* "Total income" and the various sources of income.

### **Index**

is a comparison of the variable for the given area with either the province (province = 100) or with Canada (Canada = 100).

**Interest income**

refers to the amount Canadians claimed on line 121 of the personal income tax return. This amount includes interest generated from bank deposits, Canada Savings Bonds, corporate bonds, treasury bills, investment certificates, term deposits, annuities, mutual funds, earnings on life insurance policies and all foreign interest and foreign dividend incomes.

**Investment income**

includes both interest income and dividend income.

**Labour force**

consists of all persons who reported income from employment (wages, salaries, commissions and self-employment income) or income from Employment Insurance.

**Level of geography**

is a code designating the type of geographic area to which the information in the table applies. *See* the section on Geography for further information.

**Limited partnership income**

is net income (i.e., gross income less expenses) from a limited partnership, where a limited partner is a passive or non-active partner whose liability as a member is limited to his/her investment. Included in "Other income" in the statistical tables.

**Median**

is the middle number in a group of numbers. Where a median income, for example, is given as \$26,000, it means that exactly half of the incomes reported are greater than or equal to \$26,000, and that the other half are less than or equal to the median amount. Median incomes in the data tables are rounded to the nearest hundred dollars. Zero values are not included in the calculation of medians for individuals, but are included in the calculation of medians for families.

**Negative income**

generally applies to net self-employment income, net rental income and net limited partnership income. Negative income would indicate that expenses exceeded gross income.

**Net federal supplements**

are part of the Old Age Security (OAS) pension program, intended to supplement the income of pensioners and spouses with lower income; payments take the form of a Guaranteed Income Supplement (GIS) or a Spouse's Allowance (SPA). Between 1990 and 1993, Net Federal Supplements were included in Anon-taxable income@.

**Net rental income**

is income received or earned from the rental of property, less related costs and expenses.

**New Brunswick child tax benefit**

Since 1997, this benefit supplements the Canada Child Tax Benefit for New Brunswick residents at a maximum of \$250 per year per eligible child and another maximum \$250 per year, depending on the family earned income. Included in [Provincial refundable tax credits/Family benefits](#) in the statistical tables.

**Non-taxable income/provincial (refundable) tax credits**

Non-taxable income refers to the amounts included in a taxfiler's income when applying for refundable tax credits, but not included in the calculation of taxable income; these amounts include Workers' Compensation payments, Net Federal Supplements received (Guaranteed Income Supplements and/or Spouse's Allowance), and social assistance payments. Beginning with the 1994 data, information is available separately for Net Federal Supplements, Workers' Compensation and social assistance. Provincial tax credits are a refundable credit paid to individuals by the province in which he/she resided as of December 31 of the taxation year. *See also* [Provincial refundable tax credits](#).

**Northwest Territories child benefit**

Beginning in July 1998, the Northwest Territories Child Benefit (NWTCB) is a tax-free monthly payment made to qualifying families with children under age 18. The Territorial Worker's Supplement, part of the NWTCB program, is an additional benefit paid to qualifying families with working income who have children under age 18. Benefits from these programs are combined with the CCTB into a single monthly payment. Included in [Provincial refundable tax credits/Family benefits](#) in the statistical tables.

**Nova Scotia child benefit**

Beginning in October 1998, but retro-active to July 1998, the Nova Scotia Child Benefit (NSCB) will provide tax-free monthly payments to help low- and modest-income families with the costs of raising their children. Included in [Provincial refundable tax credits/Family benefits](#) in the statistical tables.

**Nunavut child benefit**

Beginning in July 1998, the Nunavut Child Benefit (NCB) is a tax-free monthly payment made to qualifying families with children under age 18. The Territorial Worker's Supplement, part of the NWTCB program, is an additional benefit paid to qualifying families with working income who have children under age 18. Benefits from these programs are combined with the CCTB into a single monthly payment. Included in [Provincial refundable tax credits/Family benefits](#) in the statistical tables.

**Old Age Security (OAS) pension**

is part of the Old Age Security program, a federal government program that guarantees a degree of financial security to Canadian seniors. All persons in Canada aged 65 or older, who are Canadian citizens or legal residents, may qualify for a full OAS pension, depending on their years of residence in Canada after reaching age 18. Old Age Security benefits include all benefits reported for the reference year, excluding Guaranteed Income Supplements and Spousal Allowance benefits; *see also* "Net federal supplements" and "Non-taxable income".

**Ontario child care supplement for working families**

Beginning in July 1998, the Ontario child care supplement for working families (OCCSWF) is not administered by the Canada Customs and Revenue Agency (formerly Revenue Canada) and therefore families must apply for the supplement annually. This program is designed to provide assistance to low-to-middle income families with children *under the age of seven*. Included in *Provincial refundable tax credits/Family benefits* in the statistical tables.

**Other income**

includes net rental income, alimony, income from a limited partnership, retiring allowances, scholarships, amounts received through a supplementary unemployment benefit plan (guaranteed annual income plan), payments from income-averaging annuity contracts, as well as all other taxable income not included elsewhere. Beginning with the 1992 data, this variable also includes the imputed income of imputed spouses, as derived from the tax return of the filing spouse. *See also* "Total income".

**Other pensions**

include pension benefits (superannuation and private pensions) other than Old Age Security and Canada/Quebec Pension Plan benefits.

**Percent (%) apartment**

Apartment buildings are defined as having 50 units or more. This percentage is reported only for urban areas (urban FSAs and postal walks only); hence, national and provincial percentages reflect only the percentage of the urban population living in apartment complexes of 50 or more units.

**Postal walk**

*See* section on Geography.

**Provincial refundable tax credits**

unlike non-refundable tax credits, these amounts are paid to the taxfiler, regardless of tax liability. Included are the refundable provincial tax credits received by taxfilers in Manitoba, Ontario and Quebec (since 1990), British Columbia and the Northwest Territories (since 1993), Newfoundland and Nunavut (beginning in 1997), Quebec family allowances (beginning with 1994), the British Columbia family bonus (beginning with 1996), the New Brunswick child tax benefit (beginning in 1997), the Alberta family

employment tax credit (beginning with 1997), the Northwest Territories child benefit (beginning with 1998), the Nova Scotia child tax benefit (beginning with 1998), the Nunavut child benefit (beginning with 1998), the Ontario child care supplement for working families (beginning with 1998) and the Saskatchewan child benefit (beginning with 1998).

**Quebec family allowance**

includes payment of a non-taxable allowance to the parent or guardian of one or more unmarried children under the age of 18 and not a ward of the province. The applicant must have resided in Quebec for at least one month or subject his/her income or that of the spouse to the Quebec income tax laws. The QFA rate varies according to the rank of the child in the family and according to the child's age. Available starting with 1994 data. Included in *Provincial refundable tax credits/Family benefits* in the statistical tables.

**RRSP income**

is any money withdrawn from a Registered Retirement Savings Plan, either as a lump sum or as a periodic payment. Included in this amount are withdrawals and monies from RRSP annuities. Note that monies from RRIFs may be reported on line 115 (other pensions or superannuation) if the recipient is 65 years of age or older; otherwise, monies from RRIFs are reported on line 130 (other income).

**Saskatchewan child benefit**

Beginning in July 1998, the Saskatchewan Child Benefit (SCB) is a tax-free monthly payment that will help lower-income families with the cost of raising children under age 18. This benefit will help lower-income working families stay in the workforce rather than go on social assistance to meet their children's needs. Included in *Provincial refundable tax credits/Family benefits* in the statistical tables.

**Self-employment income**

is net income from business, professional, commission, farming and fishing.

**Social assistance**

includes payments made in the year on the basis of a means, needs or income test (whether made by an organized charity or under a government program). The value is reported on line 145 of the personal income tax return. Available only since 1994; previously included in "Non-taxable income".

**Suburban service**

*See* section on Geography.

**Suppressed data**

are intentionally omitted because they breach confidentiality. All data counts under a certain number are suppressed along with the corresponding income amounts. If the count for one cell or component is suppressed, then corresponding income aggregates in another cell are also suppressed to avoid disclosure by subtraction (called residual

disclosure). See the section on Confidentiality.

## **Taxfilers**

Most taxfilers are people who filed a tax return for the reference year and were alive at the end of the year. Starting with the 1993 tax year, those taxfilers who died within the tax year and who had a non-filing spouse had their income and their filing status attributed to the surviving spouse.

## **Total income**

*Note: this variable was revised over the years, as reflected in the comments below; data users who plan to compare current data to data from previous years should bear in mind these changes. Also, it should be noted that all income amounts are gross, with the exception of net rental income, net limited partnership income and all forms of net self-employment income.*

Income reported by taxfilers from any of the following sources:

### Labour force income

#### Employment income

Wages/salaries/commissions

Other employment income as reported on line 104 of the tax form (tips, gratuities, royalties, etc.)

Net self-employment

#### Employment Insurance (EI) benefits

### Pension income

Old Age Security/Net Federal Supplements (the latter including guaranteed income supplements and spouses' allowances since 1994)

Canada/Quebec Pension Plan

Superannuation and other (private) pensions

(Federal) Family Allowance benefits (up to and including 1992)

Quebec family allowance (beginning with 1994)

British Columbia family bonus (beginning with 1996)

New Brunswick child benefit supplement (beginning with 1997)

Alberta family employment tax credit (beginning with 1997)

Northwest Territories child benefit (beginning with 1998)

Nova Scotia child tax benefit (beginning with 1998)

Nunavut child benefit (beginning with 1998)

Ontario child care supplement for working families (beginning with 1998)

Saskatchewan child benefit (beginning with 1998)

### Interest and other investment income

#### Dividend income

RRSP income (since 1994; previously in "other income")

Net limited partnership income (included in "other income")

Alimony (included in "other income")

Net rental income (included in "other income")

Income for non-filing spouses (since 1992; included in "other income")  
Other incomes as reported on line 130 of the tax form (fellowships, bursaries, grants, etc.; included in "other income")  
Federal Sales Tax (FST) credit (for 1989-1990 inclusive)  
Goods and Services Tax (GST) credit (beginning in 1990)  
Harmonized Sales Tax (HST) credit (beginning in 1997)  
Child tax credit (up to and including 1992)  
Canada Child Tax Benefit (starting with 1993)  
Other non-taxable income (since 1990)  
    Workers' compensation payments (shown separately starting with 1994)  
    Social assistance payments (shown separately starting with 1994)  
    Guaranteed income supplements (included with Net Federal Supplements since 1994; previously in "non-taxable income")  
    Spouses' allowances (included with Net Federal Supplements since 1994; previously in "non-taxable income")  
Provincial refundable tax credits in Ontario, Quebec and Manitoba (since 1990), British Columbia and the Northwest Territories (since 1993), Newfoundland and Nunavut (since 1997).

*Monies not included in income above are: veterans' disability and dependent pensioners' payments, war veterans' allowances, lottery winnings and capital gains.*

### **Unemployment Insurance (UI)**

*See Employment Insurance (EI).*

### **User-defined areas**

are areas that have been defined by the data users as the specific area for which they require data. This would apply only to areas which are not "standard areas" and could include any one or a combination of areas that comprised, for example, half of a letter carrier walk in one FSA and a portion of a walk in another FSA. In other words, the area whose boundaries are a portion of, or a combination of portions of standard areas. The smallest "building block" for these special areas is the six-character postal code. To obtain data, provide us with a list of the postal codes for which data are required and we will provide the aggregated data. Also, the user-defined area may be a total of a number of individual standard areas, grouped together for a total, rather than a number of individual areas each with their own total. Of course, the area must satisfy our confidentiality requirements, or no data can be produced. *See* section on Geography.

### **Wages, salaries and commissions**

include employment pay and commissions as stated on T4 information slips, training allowances, tips, gratuities and royalties.

**Workers' compensation**

includes any compensation received under Workers' Compensation in respect of an injury, disability or death. This value is reported on line 144 of the personal income tax return. Information on Workers' Compensation is available as a distinct income source starting with the 1994 data; previously included in "Non-taxable Income".

## SECTION IV -- GEOGRAPHY

The data are available for the following geographic areas. See [A Statistical Tables - Footnotes and Historical Availability](#) for further details.

### **Standard areas:**

- a) Canada,
- b) Provinces and Territories,
- c) Census Divisions,
- d) Census Metropolitan Areas, and
- e) Postal Geography.

### **User-defined areas:**

Users may select a specific area of interest that is not a standard area for which data can be made available in standard format. To obtain data, provide us with a list of the postal codes for which data are required and we will provide the aggregated data. Of course, the area must satisfy our confidentiality requirements, or no data can be produced. See the [ASpecial Geography](#) section for further information.

## Geographic Levels – Postal Geography

The various databanks compiled from the taxfile are available for different levels of the postal geography, and for some levels of the Census geography. Coded geographic indicators appearing on the data tables are shown below with a brief description.

Level of Geography (L.O.G.)	Postal Area	Description
12	Canada	This level of data is an aggregation of the provincial/territorial totals (code 11). The national total is identified by the region code Z99099.
11	Province or Territory Total	<p>This level of data is an aggregation of the following geographies within a province:</p> <p>City Totals.....Code 08  Rural Postal Codes .....Code 09  Other Provincial Totals .....Code 10</p> <p>These totals are identified by a provincial/territorial postal letter, then a "990" followed by the province/territory code, as follows:</p> <p>Newfoundland ..... A99010  Nova Scotia..... B99012  Prince Edward Island ..... C99011  New Brunswick .....E99013  Quebec ..... J99024  Ontario ..... P99035  Manitoba ..... R99046  Saskatchewan .....S99047  Alberta ..... T99048  British Columbia ..... V99059  Northwest Territories ..... X99061  Nunavut..... X99062  Yukon ..... Y99060</p>

Level of Geography (L.O.G.)	Postal Area	Description
10	Other Provincial Total ("P" Pot)	<p>This level of data is an aggregation of small communities in the province that had less than 100 taxfilers, where these communities are combined into a "pot". Before 1992, it was identified by the same codes as the provincial/territorial totals, and only the "Delivery Mode" codes 2 and 3 distinguished between the two. To avoid this problem, starting with the 1992 data, an "8" appears after the provincial/territorial letter instead of a "9". The "9" will be reserved for the provincial/territorial total, as explained in 11 above. These "pot" codes are as follows:</p> <p>Newfoundland ..... A89010  Nova Scotia..... B89012  Prince Edward Island..... C89011  New Brunswick .....E89013  Quebec ..... J89024  Ontario .....P89035  Manitoba ..... R89046  Saskatchewan .....S89047  Alberta .....T99048  British Columbia..... V89059  Northwest Territories ..... X89061  Nunavut..... X89062  Yukon ..... Y89060</p>
09	Rural Postal Code (Not in City )	<p>This level of geography pertains to rural communities that have one and only one rural postal code. These stand-alone rural postal codes can be identified by a "zero" in the second position of the postal code and a level of geography code 09.</p> <p>The 1998 databanks contain 4,267 areas coded as level of geography 09.</p>

Level of Geography (L.O.G.)	Postal Area	Description
08	City Total	<p>This level of data is an aggregation of the following geographies for unique place names within a province/territory:</p> <p>Urban FSA (Residential) .....Code 03  Rural Route .....Code 04  Suburban Services .....Code 05  Rural Postal Code (within city) .....Code 06  Other Urban Area .....Code 07</p> <p>They have the following format: e.g., Edmonton = T95479; Regina = S94876. The pattern is the postal letter of the city plus "9" in the second position (indicating a total), followed by a 4 digit numeric code for the community (often called "CityID").</p> <p>The 1998 databanks contain 854 areas coded as level of geography 08.</p>
07	Other Urban Area (Non-residential within city - "E" Pot)	<p>This aggregation of data (or "pot") covers non-residential addresses within an urban centre and all other data not otherwise displayed. Commercial addresses, post office boxes and general delivery are included, as are residential addresses with too few taxfilers to report separately. They can be recognized by codes that are similar to the city totals, with a distinguishing difference: an "8" will follow the city postal letter rather than the "9" of the city total (e.g., Edmonton = T85479; Regina = S84876).</p> <p>The 1998 databanks contain 480 areas coded as level of geography 07.</p>
06	Rural Postal Code (Within City)	<p>These data pertain to rural postal codes that belong to communities with more than one rural postal code. These occur in areas that were formerly serviced by rural delivery service and changed by Canada Post to urban delivery service or in communities served by more than one rural postal code. Rural postal codes of this type can be identified by a "zero" in the second position of the postal code and a level of geography code 06.</p> <p>The 1998 databanks contain 360 areas coded as level of geography 06.</p>

<b>Level of Geography (L.O.G.)</b>	<b>Postal Area</b>	<b>Description</b>
05	Suburban Service	<p>Sparsely populated fringe areas of urban centres may receive their postal service from an urban post office by delivery designated as "suburban service". Their region code retains all six characters of the postal code. Suburban Services are located inside an urban FSA, usually adjacent to more highly populated areas, and mail is delivered by a contractor to group boxes, community mail boxes and/or external delivery sites (e.g., kiosks, miniparks).</p> <p>The 1998 databanks contain 28 areas coded as level of geography 05.</p>
04	Rural Route	<p>Reasonably well settled rural areas may receive their postal service from an urban post office by delivery designated as "rural route", where mail is delivered by a contractor using a motorized vehicle to a group of boxes or to gate boxes. Their region code retains all six characters of the postal code. Rural routes are located outside an urban FSA.</p> <p>The 1998 databanks contain 919 areas coded as level of geography 04.</p>
03	Urban FSA (Residential Area)	<p>The urban Forward Sortation Area (FSA, identified by the first three characters of the postal code) includes all residential addresses covered by the first three characters of a postal code in a particular urban area (not including levels 04 and 05). Only residential FSAs are considered for these databanks. This level of data is an aggregation of:</p> <p>Postal Walk .....Code 01 Other Postal Walk.....Code 02</p> <p>An Urban FSA of this type can be identified by the FSA followed by three blanks.</p> <p>The 1998 databanks contain 1,697 areas coded as level of geography 03.</p>

Level of Geography (L.O.G.)	Postal Area	Description
02	Other Postal Walk	<p>This level of data is an aggregation of urban residential postal codes unallocated to a letter carrier route and postal walks with less than 100 taxfilers. A postal walk record of this type can be identified by a region code which is the FSA followed by three blanks, and the postal walk number "XXXX".</p> <p>The 1998 databanks contain 171 areas coded as level of geography 02.</p>
01	Postal Walk	<p>This is the finest level of data and is an aggregation of urban residential postal codes allocated to a letter carrier route. A postal walk of this type can be identified by a region code which is the FSA followed by three blanks, and the postal walk number.</p> <p>The 1998 databanks contain 18,571 areas coded as level of geography 01. The total population of these postal walks is 21,395,840 (with an average population of 1,152). The walks range in size from 110 to 5,120.</p>

### Concordance files

Data that are aggregated by postal walk are accompanied by a concordance file. This file lists all of the six-character postal codes for which there is information, and identifies the postal walk to which each postal code is assigned. An urban Forward Sortation Area (FSA) may be split between two or more municipalities, and so the FSA label as well as the city identification number (or ACityID@) become important parts of the geographic identifiers. It is a combination of CityID, FSA label and postal walk number that creates unique geographic identifiers. The concordance file consists therefore of the CityID, the FSA label (called the Apostal area@), the postal walk number and the six-character urban postal code. By simply browsing the concordance file, one can determine which postal codes make up a given walk. The following illustration is an example of a concordance file.

<b>CityID</b>	<b>Postal area</b>	<b>Postal walk</b>	<b>Postal code</b>
6092	K1B	52	K1B3K5
6092	K1B	52	K1B3V5
6092	K1B	52	K1B4C6
6092	K1B	52	K1B4N7
6092	K1B	52	K1B4N9
6092	K1B	52	K1B4M8
6092	K1B	52	K1B4N9
2434	K1B	57	K1B3V6
2434	K1B	57	K1B3V7
2434	K1B	57	K1B3V8
2434	K1B	57	K1B3V9
2434	K1B	57	K1B4V1

### **"Vintage" of the postal walks**

The postal walks represented in the 1998 databanks were coded from a Canada Post Corporation file with a June 2000 reference date.

### **Old walk/new walk file**

Since postal walks are subject to change, we will also supply on request, along with postal walk aggregated data and the corresponding concordance file, a third file called the Aold walk/new walk@ file. This file shows the percentage change in the postal walks between the date of the walks to which the data are attached and the latest such information available to us from Canada Post. This file compares the six-character urban postal codes that make up the postal walk at two different points in time, and shows the percentage of the postal codes from the original (old) walk that are included in the newer walk, and the percentage of the new walk that is derived from the old. The following illustration is an example of an old walk/new walk file.

**Comparison Between Old Walks (June 2000)  
and New Walks (August 2000)**

<b>CityID</b>	<b>FSA</b>	<b>Old walk #</b>	<b>New walk #</b>	<b>% of old included in new</b>	<b>% of new derived from old</b>
2434	K1B	50	50	94	74
2434	K1B	50	51	6	8
2434	K1B	51	50	33	26
2434	K1B	51	51	61	92
2434	K1B	51	57	6	5
2434	K1B	57	57	91	50
2434	K1B	57	58	9	100
2434	K1B	52	52	29	10
2434	K1B	52	60	71	100
2434	K1B	53	52	20	24
2434	K1B	53	53	60	100
2434	K1B	53	58	20	33
2434	K1B	54	54	93	83
2434	K1B	54	55	7	5
2434	K1B	55	55	100	89
2434	K1B	56	52	30	14
2434	K1B	56	56	70	100
2434	K1B	58	52	12	10
2434	K1B	58	55	12	5

## Geographic Levels – Census Geography

Data are also available for the following levels of the Census geography; the following table shows the coded designators for these geographies, as well as a brief description of each.

Level of Geography	Name	Description
41	Census Metropolitan Areas (CMAs)	<p>The general concept of a CMA is one of a very large urban area, together with adjacent urban and rural areas which have a high degree of economic and social integration with that urban area. CMAs have an urban core population of at least 100,000, based on the previous census.</p> <p>There are 26 CMAs in the 1998 databanks:</p> <ul style="list-style-type: none"> <li>001, St. John's, Newfoundland</li> <li>205, Halifax, Nova Scotia</li> <li>310, Saint John, New Brunswick</li> <li>408, Chicoutimi-Jonquière, Québec</li> <li>421, Québec, Québec</li> <li>433, Sherbrooke, Québec</li> <li>442, Trois-Rivières, Québec</li> <li>462, Montréal, Québec</li> <li>505, Ottawa-Hull (Québec part)</li> <li>505, Ottawa-Hull (Ontario part)</li> <li>532, Oshawa, Ontario</li> <li>535, Toronto, Ontario</li> <li>537, Hamilton, Ontario</li> <li>539, St-Catharines-Niagara, Ontario</li> <li>541, Kitchener, Ontario</li> <li>555, London, Ontario</li> <li>559, Windsor, Ontario</li> <li>580, Sudbury, Ontario</li> <li>595, Thunder Bay, Ontario</li> <li>602, Winnipeg, Manitoba</li> <li>705, Regina, Saskatchewan</li> <li>725, Saskatoon, Saskatchewan</li> <li>825, Calgary, Alberta</li> <li>835, Edmonton, Alberta</li> <li>933, Vancouver, British Columbia</li> <li>935, Victoria, British Columbia</li> </ul>

<b>Level of Geography</b>	<b>Name</b>	<b>Description</b>
21	Census Divisions (CDs)	<p>General term applying to geographic areas established by provincial law (or in conjunction with Statistics Canada, as in the cases of Newfoundland, Manitoba, Saskatchewan and Alberta) and intermediate between census subdivisions and the province (e.g., counties, regional districts, regional municipalities, etc.)</p> <p>In Newfoundland, Manitoba, Saskatchewan and Alberta, census divisions have been created by Statistics Canada in co-operation with those provinces.</p> <p>There are 288 CDs in the 1998 databanks, based on the 1996 Census boundaries.</p>

## Geographic Levels – Special Geography

Clients may select geographical areas of their own definition, areas that are not part of the standard areas listed here (for example, bank service areas, retail store catchment areas). For this, clients must submit a list of the postal codes that make up their special area, and we will aggregate the micro data to correspond to that area of interest. Information ordered for special, or "user-defined" areas will be coded according to the following:

<b>Level of Geography</b>	<b>Name</b>	<b>Description</b>
93	Total for all user-defined areas	This level represents the sum total of all user-defined areas, and is the total of levels 91 and 92 described below.
92	Other user-defined areas	This level of geography represents all user-defined areas that were too small, in terms of population, to have information compiled on those areas individually (i.e. fewer than 100 taxfilers). Such areas are grouped into this "other" category.
91	Special user-defined area	Any area showing a code "91" is an area defined by a specific user according to that user's needs (for example, school catchment areas, health districts, etc.)

## Conversion files

When a client is interested in purchasing data for areas that are considered Anon-standard geography by Small Area And Administrative Data Division, a conversion file is usually necessary. A combination of postal codes making up one or more special area(s) is commonly referred to as a conversion file - an electronic file used by our staff to aggregate the different postal areas that make up the user-defined area. Simply provide us with the postal codes related to the area and we will compile the data (subject to our confidentiality restrictions). This list should include all postal codes for each area.

This would apply only to an area which is not a standard area. It could include any one or a combination of areas whose boundaries are a combination of standard areas or a combination of postal codes. User-defined areas may be branch service or school catchment areas, neighbourhoods or almost any other region.

Each postal code on a conversion file, therefore, is linked to a corresponding area code. The postal code is used as the basis for the tabulation of economic and demographic data for each area. Refer to the example below for a typical conversion file received by the Small Area and Administrative Data Division.

<b>Postal code</b>	<b>User Area</b>
A1A1A1	0001
A1A1A2	0001
A1A1A3	0001
A1A1A4	0001
A1A1A5	0001
A1A1A6	0001
A1A1A7	0002
A1A1A8	0002
A1A1A9	0002
A1A1B1	0002
A1A1B2	0002
A1A1B3	0003
A1A1B4	0003
A1A1B5	0003
A1A1B6	0003
A1A1B7	0003
A1A1B8	0004
A1A1B9	0004
A1A1C1	0004
A1A1C2	0004
A1A1C3	0004

Note:

- 1) The conversion file should have a record length of 10 bytes. The first six bytes should represent the postal code and the following four bytes should represent the user-defined area.
- 2) The postal code does NOT have a space between the third and fourth characters.
- 3) The user-defined area code is only four characters in length.

Our system cannot accommodate user-defined areas with hierarchical levels. In the previous example, areas 0001 and 0002 could not add up to their own total, with areas 0003 and 0004 adding up to their own separate total. Generating this type of hierarchical information means submitting this conversion file to our programs several times, thus increasing costs.

## **WE INVITE YOUR COMMENTS!**

We are always working on ways to improve our products. The comments we receive concerning quality and presentation are essential to meet this objective. If you have any suggestions in this regard, we encourage you, the user, to provide us with your comments.

### **Data in many forms**

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disk, diskette, computer printouts, microfiche and microfilm and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

### **How to obtain more information**

Inquiries about these data and related statistics or services should be directed to:

### **Standards of service to the public**

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## LIST OF DATA PRODUCTS AVAILABLE

The Small Area and Administrative Data Division of Statistics Canada tabulates statistical data derived from administrative records - most notably, the taxfile. Charitable Donors	13C0014	December
Neighbourhood Income and Demographics	13C0015	July
Economic Dependency Profiles	13C0017	July
Labour Force Income Profiles	71C0018	July
Families	13C0016	July
Seniors	89C0022	August
Migration Estimates	91C0025	August
Postal Area Profiles	89C0021	September

## REGIONAL REFERENCE CENTRES

The Advisory Services Division of Statistics Canada provides an information dissemination network across the country through nine regional Reference Centres. Each Reference Centre has a collection of current publications and reference documents which can be consulted or purchased, along with microcomputer diskettes, CD-ROMs, maps, and other products. Copying facilities for printed materials are available on site.

Each Reference Centre provides a wide range of additional services. On the one hand, the Dissemination Services: a free telephone inquiries line for the most recent basic data. On the other hand, Advisory Services: identification of your needs, establishing sources or availability of data, consolidation and integration of data coming from different sources and development of profiles, analysis of highlights or tendencies and, finally, training on products, services, Statistics Canada concepts and also the use of statistical data.

For more information, you can call the Reference Centre closest to you by dialling the number on the following page; if you are outside the local calling area, please dial the national toll-free inquiries number and you will be in contact with the Regional Reference Centre serving your area.

National Toll-Free **Inquiries** Line (Canada and United States): 1-800-263-1136
