Section: Derived Variables

Variable Name: KEXPIDD2 Position: 57 Length: 3

Variable that indicates a respondent's 1st or 2nd post-secondary experience, in Quebec or non Quebec, in a cegep or non-cegep institution.

		FREQ	WTD
111	1st post-secondary experience, in Quebec, in a cegep	1,587	N/A

222	2nd post-secondary experience, not in Quebec,	·	
	in any type of institution	0	N/A
		=====	=======
		1,850	N/A

Coverage: Respondents whose 1st and/or 2nd post-secondary experience occurred in cycle 2, as well as those whose 1st or 2nd post-secondary experience occurred in cycle 1 for which module K questions need to be asked.

Note:

This variable was derived from the variables: name1, name2, k_c02b, k_c06a, k_c07a, k_c63a, (variables from the sample file) namea_1 nameb_1.

The 1st position determines if it is the 1st or 2nd post-secondary experience, the 2nd position determines if it was in (1) Quebec or (2) non-Quebec province and the 3rd position determines if it is (1) cegep or (2) non-cegep institution.

For Cycle 2, Module K was revised to accommodate the possible collection of zero, one or two sets of postsecondary engagement questions. The goal, originally, was to acquire information with respect to the respondent's first postsecondary experience. For many of the respondents, this would simply be the first institution above the high school level that they have attended. However, based on information already obtained during the YITS Cycle 1 data collection, it was found that students attending CEGEP institutions and students attending NON-CEGEP institutions (e.g., university, community college outside of Québec, etc) have two distinct postsecondary experiences (in terms of cost and distance away from home). This motivated the decision to attempt to collect two sets of postsecondary engagement questions for students studying in Québec (1 CEGEP and 1 first non-CEGEP).

N.B., If the first postsecondary experience is in Quebec in a non-cegep, no cegep experience will be sought.

Variable Name: KINSTD2 Position: 60 Length: 2

Post-secondary institution identifier which identifies which institution this experience is associated with.

Allowed values: 11:24

PREQ WTD 1,850 N/A ===== 1,850 N/A 1,850 N/A

Coverage: Respondents whose 1st and/or 2nd post-secondary experience occurred in cycle 2, as well as those whose 1st or 2nd post-secondary experience occurred in cycle 1 for which module K questions need to be asked.

Note: This variable was derived from the variables: ident_i1 ident_i2 (variables from the sample file) ident_A1.

The first digit of the identifiers refers to the cycle in which the respondent started at the institution and the second points to institution in that cycle. For cycle 2 and beyond match this identifier to PSILNGID to obtain information on that institution. This identifier does not exist on the cycle 1 data file. If you need to retrieve a variable from the cycle 1 file you will need to refer to the table on Appendix B in the user's guide, which indicates which variables belong to which institution. For example if you need question H8, and KINSTID=12 then variable H8b, is associated with institution 2.

Note: This variable was derived from the variables: K2Q38 and K2Q40.

For respondents whose 1st postsecondary experience was a cegep in Quebec, a 2nd non-cegep experience may have been collected. Use KEXPIDD2 to identify if this is the 1st or 2nd experience.
