

## Post-Secondary Education Participation Survey: Quality Level Guidelines

Quality Level of Estimate	Guidelines
1) Reliable	<p>Estimates have: low coefficients of variation in the range of 0.0% - 16.5%</p> <p>No warning is required.</p>
2) Less Reliable	<p>Estimates have: coefficients of variation in the range of 16.6% - 25%.</p> <p>Estimates are flagged with one asterix, *.</p>
3) Very Unreliable	<p>Estimates have: high coefficients of variation in the range of &gt; 25% to 33.3%.</p> <p>Estimates are flagged with two asterixes, **, as a warning to the quality of the estimate.</p>
4) Too Unreliable for Release	<p>Estimates have: Very high coefficients of variation greater than 33.3%.</p> <p>These estimates are suppressed and identified with the letter F as a warning to the quality of the estimate.</p>
