Note B: The YITS 15 year old youth, parent interview survey can only identify at most 2 parents/guardians. This is determined from person 2 (the parent or guardian of the child) and person 3 (the spouse/partner of person2). Note C: The YITS 15 year old youth, parent interview survey can only identify a second parent/guardian from person 3 (the spouse/partner of person 2). Therefore, the second parent/guardian is always identified as being a spouse/partner of person 2 (respondent). Note D: The YITS 18-20 year old youth, survey can identify several parent/guardians within the family, however these individual are not necessarily married. Note E: There are several cases in which the sex of person 2 or person 3 was not stated. In order not to lose the biological parent relationship, the "sex" criteria was dropped. May include same sex spouse/partner. Note F: The YITS 15 year old youth, parent interview survey did not ask any questions that would enable us to determine these categories.

*Note:*        All parent respondents to the Youth In Transition Survey. This variable measures parents' inconsistent discipline or rejection-oriented behaviours. The Item Response Theory (IRT) score was derived using the YITS items PB17B, PB17H, PB17I, PB17L, PB17N and PB17E. This variable has been standardized with mean 0 and standard deviation one. Variable PREJE1 is the standard error for PREJS1. The methodology to derive PREJS1 was adapted to take into account the different response patterns of the question PB17E. An analysis of the responses to this question indicates that the question may have been interpreted differently on the English and the French questionnaires.

*Variable:*                    **PREJE1**                    *Position:*    562            *Length:*        8

Derived variable: Standard error for score on parents' inconsistent discipline or rejection-oriented behaviours.
