Purpose of the Survey

To obtain information on the supply of and demand for energy in Canada. This information serves as an important indicator of Canadian economic performance, is used by all levels of government in establishing informed policies in the energy area and, in the case of public utilities, is used by governmental agencies to fulfil their regulatory responsibilities. The private sector likewise uses this information in the corporate decision-making process.

Confidentiality

Your answers are confidential.

Statistics Canada is prohibited by law from releasing any information it collects which could identify any person, business, or organization, unless consent has been given by the respondent or as permitted by the *Statistics Act*. The confidentiality provisions of the *Statistics Act* are not affected by either the *Access to Information Act* or any other legislation. Therefore, for example, the Canada Revenue Agency cannot access identifiable survey records from Statistics Canada.

Information from this survey will be used for statistical purposes only and will be published in aggregate form only.

An exception to the general rule of confidentiality under the *Statistics Act* is the disclosure, at the discretion of the Chief Statistician, of identifiable information relating to public utilities, which includes undertakings supplying petroleum or petroleum products by pipeline, and undertakings supplying, transmitting or distributing gas, electricity or steam. This applies to the dissemination of aggregate survey results at the provincial or territorial level where only one or two public utilities may have reported data or where one dominates the industry in a particular province or territory.

Data-Sharing Agreements

To reduce respondent burden, Statistics Canada has entered into data-sharing agreements with provincial and territorial statistical agencies and other government organizations, which must keep the data confidential and use them only for statistical purposes. Statistics Canada will only share data from this survey with those organizations that have demonstrated a requirement to use the data.

Section 11 of the *Statistics Act* provides for the sharing of information with provincial and territorial statistical agencies that meet certain conditions. These agencies must have the legislative authority to collect the same information, on a mandatory basis, and the legislation must provide substantially the same provisions for confidentiality and penalties for disclosure of confidential

information as the *Statistics Act*. Because these agencies have the legal authority to compel businesses to provide the same information, consent is not requested and businesses may not object to the sharing of the data.

For this survey, there are **Section 11** agreements with the provincial and territorial statistical agencies of Newfoundland and Labrador, Nova Scotia, New Brunswick, Quebec, Prince Edward Island, Manitoba, Saskatchewan, Alberta, British Columbia, and the Yukon.

The shared data will be limited to information pertaining to business establishments located within the jurisdiction of the respective province or territory.

Section 12 of the *Statistics Act* provides for the sharing of information with federal, provincial or territorial government organizations.

Under **Section 11**, you may refuse to share your information with any of these organizations by writing a letter of objection to the Chief Statistician and returning it with the completed questionnaire. Please specify the organizations with which you do not want to share your data.

For this survey, there are **Section 12** agreements with the statistical agencies of Prince Edward Island, the Northwest Territories and Nunavut as well as with the Alberta Energy Department, the National Energy Board, Natural Resources Canada and Environment Canada.

For agreements with provincial and territorial government organizations, the shared data will be limited to information pertaining to business establishments located within the jurisdiction of the respective province or territory.

Record linkages

To enhance the data from this survey, Statistics Canada may combine it with information from other surveys or from administrative sources.

Inquiries

This schedule is to be completed and returned to Statistics Canada, 150 Tunney's Pasture Driveway, Ottawa, Ontario, K1A 0T6. If you require assistance in the completion of the questionnaire, contact the Energy Section by telephoning **1-877-604-7828** or by fax at **1-888-883-7999**.

Fax or other Electronic Transmission Disclosure

Statistics Canada advises you there could be a risk of disclosure during the facsimile or other electronic transmission. However, upon receipt of your information, Statistics Canada will provide the guaranteed level of protection afforded to all information collected under the authority of the *Statistics Act*.

INSTRUCTIONS

- (1) Please complete and return by June 27, 2011.
- (2) All numbers to the left of the items listed in the statements refer to the Oil Pipeline Uniform Accounting Regulations and are provided for your convenience in interpreting the questionnaire.

CERTIFICATION

I certify that the information contained herein is substantially complete and correct to the best of my knowledge and belief.

Oil Pipeline Annual Employment and Payroll

Company	Province of
---------	-------------

DEFINITIONS		
-------------	--	--

1. Management:

(a) Include working owners and partners of unincorporated businesses.

(b) Include presidents, vice-presidents, department managers, and other senior members of management.

2. Professional, Technical and Administrative:

(a) Geophysicists: Include only university graduates engaged in geophysical work and personnel without a degree who have equivalent positions.

(b) Geologists: Include only university graduates engaged in geological work and personnel without a degree who have equivalent positions.

(c) Petroleum engineers: Include university graduates engaged in all phases of development and producing oil or gas and personnel without a degree who have equivalent positions.

(d) Other engineers: Include all other engineers holding a university degree or personnel who have equivalent positions.

(e) Other professional: Include chartered accountants, lawyers, economists and other administrative personnel with a degree who have equivalent positions.

(f) Specialists and technicians: Include all salaried non-graduates directly connected with the technical operations; scouts, landmen, computers, draftsmen, laboratory technicians, pilots, etc. should be included in this category. Exclude personnel connected directly with field and plant operations to be included in Question 3 below.

(g) Clerical and secretarial: Self-explanatory.

(h) Other administrative: Include personnel holding supervisory or administrative positions not included elsewhere above.

3. Production, Field, Plant and Related Workers:

(a) Wage-earners: Include skilled and unskilled workmen, technicians, and specialists directly connected with field or plant operations such as welders, geophysical helpers, battery operators, rumpers, gaugers, roughnecks, etc.

Oil Pipeline Annual

Engineering and Operating Statistics as at December 31, 2010

Length of Pipeline in Kilometres

A. Gathering lines:														
Province	Outside diameter of pipe in millimetres													TOTAL
	0-75	76-99	100-125	126-150	151-226	227-277	278-328	329-429	430-480	481-531	532-658	659-759	760 & over	

B. Trunk lines: Main Lines														

Parallel lines and loops ¹														

(1) Parallel lines are defined as pipelines which occupy the same right-of-way as the main line or right-of-way adjacent to and essentially parallel with the main line, and which have an independent pressure source and through which the product carried has a common origin and destination.

Loops are defined as pipelines which occupy the same right-of-way as the main line, or right-of-way immediately adjacent to and parallel with the main line, and which are not completely independent of the main line for a pressure source, and through which the product carried has a common origin and destination.

Please insert pipeline length for main lines separately from parallel lines or loops, where there is more than one main line, please enter pipeline length figures separately.
