#### Information for Respondents

#### **Survey Objective**

This annual survey of traveller accommodation businesses is conducted by Statistics Canada to collect business operating information for statistical and economic analysis of the industries as mandated by the agency to fulfil the demand of many users. The results of the survey are used by business operators and associations for market analysis and assessment of industry performance, operating characteristics and trends, by governments to develop national and regional economic policies, by agencies such as the Canadian Tourism Commission for analysis and policy making and for providing valuable statistics and information feedback to the industries, and by Statistics Canada for maintaining important data input to the preparation of the Canadian System of National Accounts.

## **Survey Reporting Unit**

The reporting unit for this survey questionnaire is the business operating establishment (accommodation property) of the traveller accommodation businesses. The operating establishment may be owned by a corporation, a sole proprietor, a limited partnership or a joint-venture partnership. The identification of such legal entity and the operating or trade name of this operating establishment have been labelled in this questionnaire. Please make corrections or additions to the label above if necessary.

#### Confidentiality

Statistics Canada is prohibited by law from publishing any statistics which would divulge information relating to any identifiable business without the previous written consent of that business. The data reported on this questionnaire will be treated in strict confidence, used for statistical purposes, and published in aggregate form only. The Confidentiality provisions of the Statistics Act are not affected by either the Access to Information Act or by any other legislation.

## Note of Appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.
