The **purpose** of this survey is to collect accurate, up-to-date information on farm product prices. These prices are used to calculate farm cash receipts, to negotiate international trade agreements, to formulate income stabilization policies and to help farmers make informed management decisions.

What is the average price, you, or farmers in your neighbourhood, **received** on or near the 15th of this month for each of the following commodities? Please report an average price which takes into account all grades. Report the transaction price received when ownership first changes hands.
