AMIO ASG

Introduction:

Statistics Canada is conducting a national survey on the health of Canadians. This is a follow-up of a survey that we conducted in 1998 and 1999. The National Population Health Survey collects information on the health of people in Canada, on the use of health services and on some of the factors that can affect health.

Your answers will be kept strictly confidential and used only for statistical purposes. While participation is voluntary, your assistance is essential if the results are to be accurate.

D. General Health

This part of the survey deals with various aspects of your (...'s) health. By health, we mean not only the absence of disease or injury but also physical, mental and social well-being.

D1. In general, would you say your (. . . 's) health is:

GHI0_1 (Mark one only.)

- 1 ... excellent?
- 2 ... very good?
- 3 ... good?
- 4 ... fair?
- 5 ... poor?

E. Health Status

The next set of questions asks about your (. . .'s) day-to-day health. The questions are not about illnesses like colds that affect people for short periods of time. They are concerned with a person's usual abilities. You may feel that some of these questions do not apply to you (. . .), but it is important that we ask the same questions of everyone.
