Purpose of the Victim Services Survey

The purpose of the Victim Services Survey is to collect data on the programs/victim services that provided services to primary and secondary victims of crime during the previous 12 months of operation, as well as to provide a one-day “snapshot” of the clientele being served on a specific date. The survey also collects annual information from criminal injuries compensation / financial benefits programs for victims of crime. The Victim Services Survey is distributed across Canada to all system-based, police-based, court-based and community-based victim services, sexual assault centres and provincial / territorial financial benefits programs for victims of crime. While participation in this survey is voluntary, your co-operation is important to ensure that information collected in this survey is as accurate and comprehensive as possible. The information collected will be useful for service providers, non-government organizations and governments for developing programs, policies and services for victims of crime.
