General Information

Purpose

The purpose of the survey is to collect information on the capital expenditures of the Canadian oil and gas extraction industry. This information is required for inclusion in the quarterly estimations of investments in the Gross Domestic Product (GDP), for the System of National Accounts. As oil and gas exploration, development and production activities in Canada continue to grow in importance, it is essential that GDP measures fully incorporate the level and growth of these activities. GDP data are used by private industry in decision-making as well as by various associations, industry analysts, and federal and provincial departments and agencies to assess the strength of the Canadian economy. Your information may also be used by Statistics Canada for other statistical and research purposes.

Authority

This information is collected under the authority of the *Statistics Act*, Revised Statutes of Canada, 1985, Chapter S-19. Completion of this questionnaire is a legal requirement under this Act.

Confidentiality

Statistics Canada is prohibited by law from releasing any information it collects which could identify any person, business,

or organization, unless consent has been given by the respondent or as permitted by the *Statistics Act*. Statistics Canada will use the information from this survey for statistical purposes.

Record linkage

To enhance the data from this survey, Statistics Canada may combine it with information from other surveys or from administrative sources.

Reporting instructions

- Please refer to the Reporting Guide on page 3 before completing the requested information.
- Information should be reported for your Canadian operations only.
- Please report in thousands of Canadian dollars ('000 CAN\$).
- Account for only your net interest (participating interest) in contractual agreements such as joint ventures.
- Report capital expenditures (new assets, renovation and retrofit) by calendar quarter. If you wish to report by a fiscal quarter different than calendar, please report for the quarters closest to the periods under review.
- Timeliness, on which the value of the national accounts depends, should not be sacrificed to the desire for absolute accuracy in the data reported. Provide your own best estimates when final accounting figures are not available at the time of the survey.

Capital Expenditures

For each Category of capital expenditure listed below, what were the expenditures for the three month periods ended March 31, 2013 and June 30, 2013 (provide your own best estimates when final accounting figures are not available)?

Category of capital expenditure	March 31, 2013 (‘000 CAN\$)	June 30, 2013 (‘000 CAN\$)

Reporting Guide

Capital Expenditures

Capital Expenditures are the gross expenditures on fixed assets for use in the operations of your organization or for lease or rent to others, including the following:

- cost of all non-residential buildings, engineering structures, and machinery and equipment which normally have a life of more than one year and are charged to fixed asset accounts
- modifications, additions and major renovations
- capital costs such as feasibility studies, architectural, legal, installation and engineering fees
- subsidies
- capitalized interest charges on loans with which capital projects are financed
- additions to work in progress
- assets acquired for lease to others, either as a capital, financial or as an operating lease, but exclude assets acquired as a lessee through either a capital, financial or an operating lease from others
- Imports of used assets since they represent newly acquired assets for the Canadian economy

Exploration and Evaluation

These expenditures include mineral rights fees and retention costs, geological, geophysical and seismic expenses, exploration drilling, and other costs incurred during the reporting period in order to determine whether oil or gas reserves exist and can be exploited commercially. Report gross expenditures, before deducting any incentive grants, incurred for oil and gas activities on a contracted basis and/or by your own employees. Exclude the cost of land acquired from other oil and gas companies.

Building Construction

Include capital expenditures on buildings such as office buildings, camps, warehouses, maintenance garages, workshops, and laboratories. Fixtures, facilities and equipment that are integral parts of the building are included.

Other Construction Assets

Include all infrastructure, other than buildings, such as the cost of well pads, extraction and processing infrastructure and plants, upgrading units, transportation infrastructure, water and sewage infrastructure, tailings, pipelines and wellhead production facilities (pumpjacks, separators, etc). Include all preconstruction planning and design costs such as development drilling, regulatory approvals, environmental assessments, engineering and consulting fees and any materials supplied to construction contractors for installation, as well as site clearance and preparation. Equipment which is installed as an integral or built-in feature of a fixed structure (i.e. casings, tanks, steam generators, pumps, electrical apparatus, separators, flow lines, etc.) should be reported with the construction asset; however, when the equipment is replaced within an existing structure, the replacement cost should be reported in machinery and equipment (sustaining capital).

Machinery and Equipment

Include transportation equipment for people and materials, computers, software, communication equipment, and processing equipment not included in the above categories.
