6121	7611 3234	Manoeuvre avec compétences en premiers soins	Trade Helper, Labourer with first Aid Ticket	

**58 total occupations
27 included in 1999
3 not able to publish**

LEGEND:

Sub Group - numbers assigned by Statistics Canada for this survey to identify each occupation and variations requested by the consultation group.

NOC - Code for the occupation description found in the National Occupational Classification System (available through HRDC). Where more than one NOC code is listed with an occupational title, for the purpose of this survey, the occupation contains elements of each of the listed descriptions.

* - for the purpose of this survey, the NOC description has been varied or adjusted according to information received from consultation group members.

'P' - in the first surveys, 1999 -2001, the occupation was requested by the province's consultation group, and sufficient data was collected to publish a wage rate for that occupation in the survey results and in the subsequent federal Fair Wage Schedules.

'x' - in the first surveys, 1999-2001, the occupation was requested by the province's consultation group, but the survey did not obtain enough results to publish a wage rate without compromising the privacy of the contractors or workers surveyed.

'y' - the occupation has been requested for the second surveys, 2002 - 2005.

Blank space - the occupation was not requested and has not been/will not be included in the survey or the subsequent Fair Wage Schedules.

Italicized occupational titles/ heavy lines - variations, alternate titles, and/or components of a single occupation. Consultation groups may select the broadest , all inclusive occupational title, or one or more of the variation or component titles.

NOTES:

Apprentices and entry level workers are not included in this survey. (Variation of fair wage rates for apprentices registered in programs established by the provincial government is addressed in the Apprentice Tables appended to the main federal Fair Wage Schedule.)

Employers are asked to provide wage information for journeypersons. For this survey, the term 'journeyperson' means experienced, or considered competent by the employer, regardless of whether the worker has a trade licence.

**For those occupations where provincial legislation requires that a worker have the trade licence or certificate, or be registered as an apprentice, in order to work in the trade, this survey will collect information only about certified or licenced workers. Depending on the practice in the province, the terms 'compulsory', 'designated', 'mandatory' or 'certified' will be used to identify these occupations.*

The survey will ask for wage information from companies whose workers who have worked on commercial, institutional (including residential units on military bases), or heavy civil (such as roads, wharves, bridges) construction sites in the 12 months prior to the survey.

For our purposes, full-time employees are defined as working 30 or more hours per week.

For wage rate questions, please indicate the gross rate of pay, EXCLUDING vacation pay, statutory holidays, overtime, bonuses or employer's contribution to benefits. Please exclude owners, contract workers, foremen and volunteers.
