

BLACK HISTORY MONTH

2022

Black History Month is an opportunity to highlight the contributions and accomplishments of Black Canadians and their communities, today and every day.

Fighting COVID-19 on the front lines

In 2016, one-third of female Black workers aged 25 to 59 in Canada worked in the health care and social assistance sector. No other sector has such **high proportions of female Black workers**.

A positive outlook

Among Canada's Black population, **76%** of immigrants and **85%** of non-immigrants felt that their life opportunities would improve within the next five years. Among the rest of the population, these proportions were significantly lower (**57%** and **46%** respectively).

More likely to hold a bachelor's degree or higher

In 2021, Black Canadians in the core age group (25 to 54 years) were more likely to hold a bachelor's degree or higher (**41.1%**) than people in the same age group who did not belong to a visible minority and were not Indigenous (**34.2%**).

Contributions to the scientific community

In 2016, there were 71,365 Black Canadians 25 years and older that had a postsecondary certificate, diploma or degree in science, technology, engineering, and mathematics (STEM).
