

World Environment Day

Each initiative we take to care for the environment brings us one step closer to **leaving a sustainable planet** for future generations.

Fuelled by renewable energy

Zero-emission vehicles (ZEVs) have grown in popularity nationwide. In 2020, **54,353** new ZEVs were registered in Canada, accounting for **3.5%** of new vehicle registrations in the country.

Source: Statistics Canada, Zero-emission vehicle registrations down slightly in 2020.

Dispose with care

It can be challenging for households to dispose of consumer electronics they no longer want.

In 2017, **58%** of households that had unwanted computers sent them to a **depot or a drop-off centre**.

Reducing organic waste

In 2018, **2.9 million tonnes** of organic waste were **diverted from landfills**.

Under the sea

To **preserve marine life**, Canada had established **59 marine refuges** as of April 2019.
